Aligarh, Uttar Pradesh, India • Seeking Research & Professional Internships

PROFESSIONAL PROFILE

Highly motivated Computer Science undergraduate (BCA) specializing in Data Science pipelines and Cyber Security audits. Capable in building intelligent automation scripts, configuring secure system models, and modeling predictive analytics frameworks using Python. Combines solid database management logic (DBMS) and hands-on exposure to vulnerability assessments on Kali Linux environments, aiming to deliver robust software architectures and contribute to advanced analytics and threat-hunting tasks.

EDUCATION

Mangalayatan University <i>Bachelor of Computer Applications (BCA)</i> - Focusing on computational logic, systems architecture, data science lifecycles, and relational database management (DBMS). - Configuring system penetration testing setups (Kali Linux, Parrot OS) to audit secure architectures and identify network vulnerabilities. - Utilizing Linux command scripts and relational SQL architectures to model data and configure environment assets.	2024 – Present <i>Aligarh, UP</i>
Bihar School Examination Board (BSEB) <i>12th Standard — Intermediate (PCM Stream)</i> - Graduated with focus in Mathematics, Physics, and Chemistry. - Developed strong analytical capabilities, discrete arithmetic analysis skills, and algorithmic logic.	2021 – 2023 <i>Patna, Bihar</i>
Bihar School Examination Board (BSEB) <i>10th Standard — High School Matriculation</i>	2020 – 2021 <i>Patna, Bihar</i>

TECHNICAL SKILLS

Programming Languages: Python (Proficient), C++, SQL, JavaScript, HTML5, CSS3
Data Science & AI Libraries: Data Analytics, NumPy, Pandas, Matplotlib, OpenCV (Computer Vision), Scikit-Learn
Cybersecurity & DevOps: Bug Bounty Hunting (Beginner), Vulnerability Assessment, Kali Linux, Parrot OS, Prompt Engineering, Bash Scripting

ACADEMIC PROJECTS

Sales Prediction & Marketing Analytics Dashboard <i>Python • Scikit-learn • Streamlit • Pandas • Plotly</i> - Developed an end-to-end predictive analytics web application using Streamlit to forecast future sales and optimize multi-channel marketing spend. - Built and trained a Linear Regression model using Scikit-learn to predict revenue based on advertising expenditures, audience segments, and platform metrics. - Conducted extensive Exploratory Data Analysis (EDA) utilizing Pandas, Seaborn, and Plotly to engineer automated marketing strategy recommendations and trend visualizations.	2026
Car Price Prediction System <i>Python • Random Forest • Scikit-learn • Streamlit • Pandas</i> - Engineered an end-to-end Machine Learning pipeline to predict the resale value of used cars based on vehicle age, mileage, fuel type, and transmission metrics. - Trained and optimized a Random Forest Regressor model using Scikit-learn, implementing robust data preprocessing and feature engineering to maximize prediction accuracy. - Deployed an interactive web application using Streamlit and Matplotlib, enabling users to receive real-time, data-driven automobile price estimations.	2026
Interactive Portfolio Hub <i>HTML5 • CSS3 • JavaScript (ES6) • GSAP • EmailJS API</i> - Designed and developed a highly responsive developer portfolio featuring a modern glassmorphic UI, dynamic project galleries, and modal-based credential preview systems. - Engineered immersive fluid animations, interactive micro-interactions, and a custom interactive starfield background utilizing GSAP, ScrollTrigger, and HTML5 Canvas APIs. - Integrated dynamic browser-side configurations, including local-storage persistent dark/light theme toggles and a serverless contact form processed via EmailJS API hooks.	2026

CERTIFICATIONS

- **Data Science Foundations** – Skill India (Completed)
- **Cyber Security Professional** – Skill India (Completed)
- **Generative AI for Business** – LearningGT (Completed)

CORE COMPETENCIES

- **Analytical Problem Solving:** Experienced in analyzing complex data trends and debugging software issues.
- **Adaptive Technical Skills:** Dedicated to researching and mastering emerging data science tools, machine learning pipelines, and vulnerability assessments.
- **Collaboration & Communication:** Collaborative team member active in college coding clubs and academic projects.

LANGUAGES & INTERESTS

- **Languages:** English (Professional Proficiency), Hindi (Native / Bilingual)
- **Interests:** AI Automation, Cyber Security Audits, Bug Bounty Hunting, Speech Recognition systems
